Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: appliance with adhesive layer;

Species II: appliance with sockets formed of soft plastic/base and margins stiff plastic;

Species III: appliance with front of soft material and rear of stiffer material;

Species IV: appliance with hinge or hinge mechanism;

Species V: appliance with extended lingual tabs;

Species VI: appliance with adhesive in the sockets;

Species VII: appliance with a reline material

Species VIII: appliance that is thicker at the second end;

Species IX: appliance with wedges;

Species X: appliance with hinge that is more rigid than upper and lower bases;

Species XI: appliance with preformed socket and customized socket.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3732

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Todd E. Manahan whose telephone number is 571 272- 4713. The examiner can normally be reached on Mon-Fri.
